Gentlemen:

Enclosed please find a copy of the Standard Operating Procedure (SOP) for Collection of Floor/Equipment Rinsate Samples for Operable Unit No. 15 (OU15) for your review and approval.

The OU15 Phase I RFI/RI workplan states that volatile organic compounds (VOCs) will be included in the analytical suite due to historical use of storage of VOCs in the OU15 Individual Hazardous Substance Sites (IHSSs). However, VOCs are unlikely to be present at detectable levels with non-intrusive sampling methods on the floor surface. The enclosed SOP includes VOC sample collection, but upon your concurrence, DOE proposes to limit these samples to those necessary for waste determination of any rinsate water in excess of that required for the suite of analytes described in the workplan. At least one VOC sample will be collected for each IHSS.

We would appreciate an expeditious response as field sampling is currently scheduled to begin June 1993.

If you have any questions or comments, please contact Jen Pepe of my staff at 966-2184.

Sincerely,

James K. Hartman  
Assistant Manager for Transition  
and Environmental Restoration
